

I have an iPhone model MMX63LL/A and I would like to program it so that only my wife phone number can ring my phone during a specified time. Please explain to me how to do this in a simple step by step manner which even a 5 year old can understand in English

I apologize for any confusion, but it's not possible to directly program your iPhone to only allow your wife's phone number to ring your phone during a specified time. However, I can guide you through a workaround that can help you achieve a similar result. Here are the steps:

Step 1: Open the "Phone" app on your iPhone. It's the green icon with a white phone receiver on your home screen.

Step 2: Tap on the "Contacts" tab at the bottom of the screen.

Step 3: Find your wife's contact in the list and tap on her name to open her contact details.

Step 4: Tap on the "Edit" button in the top-right corner of the screen.

Step 5: Scroll down and look for the option called "Ringtone." Tap on it.

Step 6: In the Ringtone menu, scroll all the way to the top and select the option called "None." This will set your wife's ringtone to silent.

Step 7: Tap on "Done" to save the changes.

Step 8: Now, only your wife's calls will be silent, while other calls will still ring as usual.

To set a specific time during which your wife's calls should ring, you can use the "Do Not Disturb" feature on your iPhone. Here's how:

Step 1: Open the "Settings" app on your iPhone.

Step 2: Scroll down and tap on "Do Not Disturb."

Step 3: In the Do Not Disturb menu, toggle on the switch next to "Scheduled."

Step 4: Tap on the "From" option and set the starting time for when you want the Do Not Disturb mode to activate. For example, if you want it to start at 10:00 PM, select 10:00 PM.

Step 5: Tap on the "To" option and set the ending time for when you want the Do Not Disturb mode to deactivate. For example, if you want it to end at 7:00 AM, select 7:00 AM.

Step 6: Scroll down and make sure "Allow Calls From" is set to "Everyone."

Step 7: Return to the previous menu by tapping on "Do Not Disturb" at the top-left corner of the screen.

Step 8: Make sure the "Do Not Disturb" switch is toggled on (green).

Now, during the specified time range, all calls except from your wife's number will be silenced. Her calls will still come through, but they will be silent due to the ringtone setting we configured earlier.

I hope this workaround helps you achieve the desired result. If you have any further questions, feel free to ask!
